PRESS RELEASE

for immediate release

A « Business and employment » database in Matawinie

Saint-Alphonse-Rodriguez, August 5th, 2010 – A new tool is now available for job seekers, as well as to improve the visibility of Matawinie businesses. It is the « Business and employment » database, accessible via the SADC Matawinie's website. It was developed in partnership with the SADC Achigan-Montcalm and d'Autray-Joliette, with the goal of improving access to information, as well as the placement rate within regional businesses, and stimulating business development.

This directory allows you to conduct research to establish lists of jobs held in each of the manufacturing and specialized businesses. You may also obtain the contact information, geographic location and sectors of activity of those businesses, as well as job descriptions, required training and additional requirements needed to access your desired profession.

The window to the MRC Matawinie's businesses is constantly evolving and currently lists several businesses from the manufacturing and industrial sectors. To this end, a questionnaire was forwarded to them during the months of June and July and the data collected has been integrated into our database, as was shared with us. We invite those businesses who have yet to submit the questionnaire, to do so and return it, via the contact information provided.

Along with this project, a directory is also being developed for the MRC Matawinie, but is being developed by the CLD Matawinie. It will list all businesses in the MRC. It is a great undertaking, which will allow us to paint a clearer picture of businesses and employment opportunities available in our region.

We invite you to consult our Business and employment directory on the SADC Matawinie's website, at www.matawinie.qc.ca You may also obtain the form which needs to be completed in order to list your business.
